SOIL REUSE & RECYCLING

CIVIL CONSTRUCTION
SOIL & MATERIAL
DISPOSAL & SUPPLY

REAL TIME MATERIAL
TRACKING WITH FULL
CHAIN OF CUSTODY

5 MILLION CUBIC METERS
OF SOIL PER ANNUM
RECOVERED

ResourceCo's Soil Reuse and Recycling operations provide services to the civil construction market by providing cost effective, efficient and sustainable soil export and import solutions across Victoria, South Australia, New South Wales and Queensland.

OTHERS SEE WASTE, WE SEE OPPORTUNITY

ResourceCo is a nation-wide leader in maximising the value in all types of waste. Our expertise in repurposing construction and demolition, commercial and industrial waste and soils offers our clients integrated solutions to material disposal and re-supply.

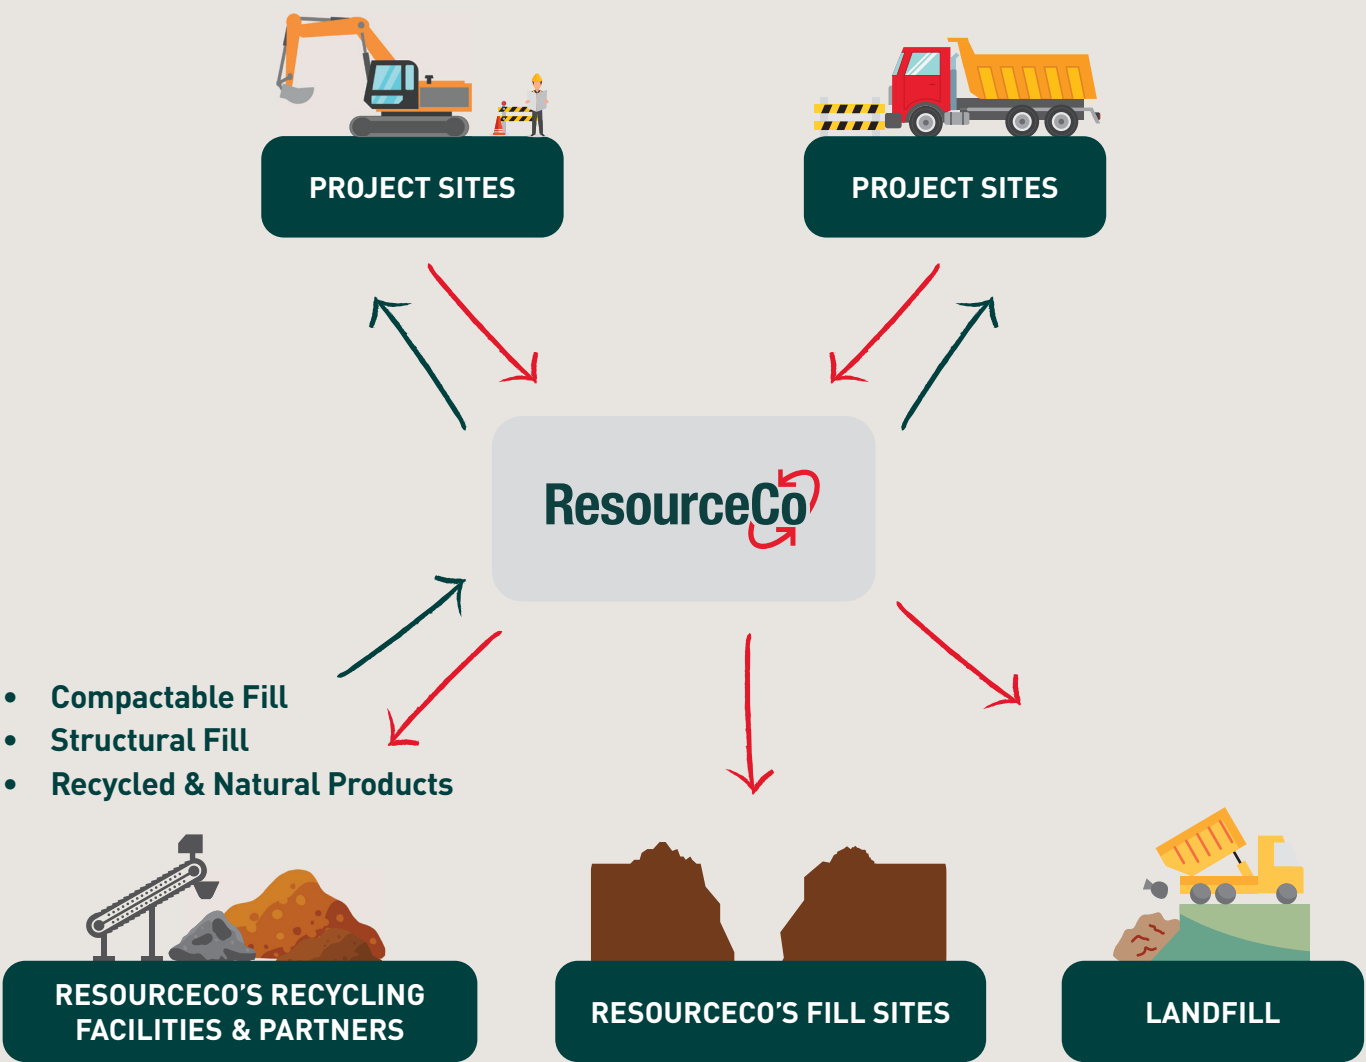

In what is a highly competitive market, we provide solutions to the full cross-section of soils with a range of geotechnical properties.

We provide solutions for structural materials that are reused in the civil construction

sector, fill materials that are reused in rehabilitation projects, excavated sands are recycled into construction materials such as bedding sands and concrete sands, and topsoil is recycled into landscaping products.

We also manage the safe transport and disposal to landfill of contaminated soils that are unable to be recycled.

MATERIAL FLOW - SOIL REUSE & RECYCLING.

MATERIAL TRACKING & TRACEABILITY

ResourceCo provides end to end solutions with full chain of custody.

We keep our customers moving by offering sustainable solutions for all waste streams of the construction lifecycle - everything from commercial building and demolition waste right through to contaminated soils and structural materials found in the bulk excavation process.

Our leading-edge material management systems also allow us to directly reuse significant volumes of structural material, taking them directly back into new development projects for immediate use.

In a market that moves rapidly, our team remains at the forefront of these changes to ensure our customers are provided the most efficient, cost effective and sustainable solutions available.

ResourceCo's unrivalled pedigree in recycling demolition, construction, commercial and industrial waste gives us the optimal experience necessary to transform the soil we handle into a range of new, high-value products for sale back into the construction market.

OUR INDUSTRY LEADING TECHNOLOGY

ResourceCo's industry leading technology integrates our operations with your needs. Every day our systems give our clients the peace of mind by knowing in real time what materials are moving to and from their site.

We have an adaptive approach to soil reuse and recycling. If there's a more efficient

and effective way to manage your soil needs, ResourceCo can identify it. Whether it be before or even during the commencement of the job, we're always on the lookout for ways to maximize the potential of all the material we handle.
